

The Cray User Group (CUG) has had an association with Bob and Karen Winget of Toolbox Conference Management (ToolboxCM) for over 18 years. It began with publishing hardcopy volumes of CUG Conference Proceedings. They excelled in this support. In the past 10 years, we have expanded our relationship to include CUG office management, web site development and maintenance, electronic conference proceedings, documenting CUG meeting procedures, and CUG conference management. In their conference management duties they have developed procedures and tools for abstract submission, local conference arrangement support, and on-line payment systems.

Toolbox Conference Management has provided great support for many CUG financial activities. In my 5 years of association with ToolboxCM, I have found them to be very reliable, responsive, extremely friendly, flexible and most important for this volunteer organization, cost effective. I highly recommend Toolbox Conference Management personally and professionally.
